

### 3. Expirytime - payeeaddress - minimumsubscriptionamount Applications

"Gauging public interest on a new innovation, and potentially turning it into an enterprise, using this smart contract" which is publicly verifiable.

This will setup that enterprise for future funding with proof of concept, and measure of support.

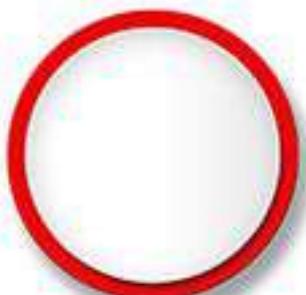

### 3. Expirytime - payeeaddress - minimumsubscriptionamount

#### Applications

So if a startup can successfully *close* such a smart contract, it means its a good idea to back up with bigger money. It is **proof** that a startup can cross some barrier successfully.

You also get all the blockchain **advantages** plus cross border payment advantages as well.

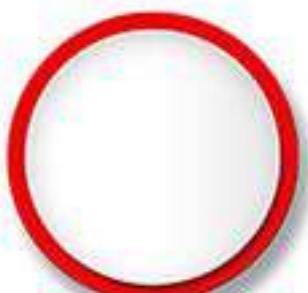

4. **Expirytime - payeeaddress - contractAmount - minimumsubscription amount**

Application

"Organizing **crowdfunded events** like concerts (Control Alt Del Mumbai)"

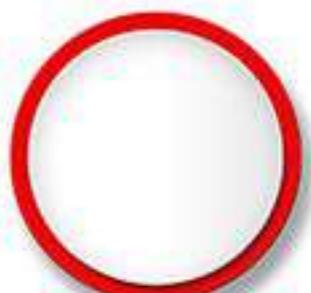

"Organizing **funds for relief causes** like buying masks for Corona"

## 9. Expirytime - userchoice

### Applications

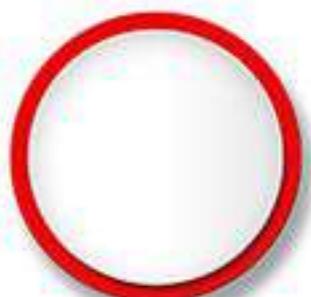

- \* A smart contract can be created for a **music concert where users vote on** lineup for the concert. If the users wins (votes for a band which is actually coming) he pays less money to buy the ticket later on.

## 9. Expirytime - userchoice

### Applications

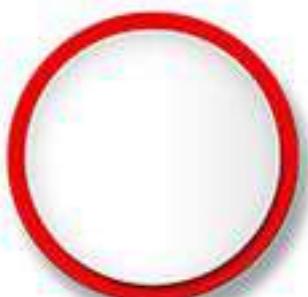

- \* A voting Smart Contract to decide the best project in a college. Participants can vote on what they think will the best project by spending some tokens. If their choice of project wins, they win some money back.

## 9. Expirytime - userchoice

### Applications

- \* A voting Smart Contract **to decide artist lineup** for a music concert. People will spend tokens to participate, based on the final lineup the collected tokens will be distributed to the winners.

## 9. Expirytime - userchoice

### Applications

- \* A voting Smart Contract **for best salon in town**. The salons whose names are in the userchoice list will convince their customers to vote for the saloon using a little amount of money. And if the salon wins, the participants get monetary reward. Salon owner can incentive this by giving a free haircut to the people who voted (& won) once.
